3. Employability

Evaluation of the study programme graduates employability.	<p>Since its foundation at the reestablishment of the University of Trnava in 1992, the History and Theory of Art and Architecture programme has been conceived more broadly than the studies in the traditional sister departments of art history. The basis of the specific teaching is the understanding of art in a broader cultural-historical as well as philosophical-aesthetic context. The department is devoted to a broad overview of the history of art in all its manifestations and periods, that is, up to the present day, as well as to a broad theoretical base of preparatory courses and courses that scientifically go beyond the basic framework of art history. Through lectures and active work in seminars, exercises, professional excursions at home and abroad, and the possibility of professional practice, future graduates specialize in specific areas in the field of art history. Particularly beneficial in this area are student internships in the field of monument care, which directly prepare graduates for the possibility of employment in this field.</p> <p>The aim of teaching in the field of History and Theory of Art is the comprehensive preparation of the graduate of the university to be able to be professionally active in the sphere of art and culture in organizations and workplaces whose focus is determined by the needs of artistic and cultural development, the protection of cultural heritage, the development of artistic activity, research and active support of the educational process. Graduates of the Department of History and Theory of Art find practical employment in the offices of monument care, in regional galleries and museums, in institutions engaged in cultural activities, where they are prospective, professionally erudite scientific and pedagogical workers.</p>
